

THE NEXT LEAP IN TAPE TECHNOLOGY – INTRODUCING LTO10 MEDIA

We are proud to announce the official launch of LT ZERO LTO-10 Tape Media—our latest innovation designed to meet the ever-growing demands of long-term, secure, and cost-efficient data storage.

LT ZERO LTO-10 delivers unmatched quality and reliability, ensuring enterprises have the confidence to protect and archive their most valuable data for decades.

Key Features of LT ZERO LTO-10 Media

- Massive Capacity: Up to 18TB native and 45TB compressed per cartridge.
- High Performance: Transfer rates of 400 MB/s native (1,000 MB/s compressed) for faster backup and recovery cycles.
- Enterprise Security: Hardware-based AES-256 encryption and WORM (Write Once, Read Many) support to meet compliance and ransomware-protection requirements.
- Longevity & Reliability: Designed for 30+ years archival life, ensuring long-term data preservation.
- Green Efficiency: Lowest cost per TB with zero power consumption at rest.

Important Compatibility Update

Unlike prior generations, LTO-10 Media is not backward compatible with LTO-9 drives. It can only be used with LTO-10 tape drives, making forward-planning essential for migration strategies.

Why LT ZERO LTO-10 Media?

Manufactured by SONY with industry-leading standards of quality and durability. Enables organizations to address data growth, compliance, and long-term retention at the lowest cost per TB.

Perfect for BFSI, Government, Healthcare, Media & Entertainment, and HPC/AI workloads.

At LT ZERO, our mission is to simplify, secure, and optimize the data lifecycle. With the launch of LT ZERO LTO-10 Tape Media, we continue to deliver on that promise—empowering enterprises to scale their storage with confidence.
