

## **PRODUCT ANNOUNCEMENT – LTO-10 DRIVE AVAILABILITY ACROSS LT ZERO TAPE LIBRARIES**

LT ZERO is pleased to announce the availability of LTO-10 tape drives across our flagship tape libraries: BD340, BD680, and Orion MC6.

With this launch, LT ZERO continues to deliver next-generation scalability, resilience, and performance for enterprises requiring reliable long-term data protection and archive.

### **Key Highlights of LTO-10:**

- Capacity: Up to 18 TB native per cartridge (45 TB compressed\*)
- Performance (Throughput):
- Half-Height (HH) Drive: Up to 400 MB/s native (1,000 MB/s compressed\*)
- Full-Height (FH) Drive: Up to 500 MB/s native (1,250 MB/s compressed\*)
- Security: Built-in hardware encryption and WORM support for compliance
- Scalability: Seamlessly integrates into BD340, BD680, and Orion MC6 environments for flexible growth
- Eco-Efficiency: Reduced power consumption and lowest cost per TB for sustainable data management
- Note: LTO-10 is not backward-compatible with LTO-g media.
- At LT ZERO, we are committed to providing our customers with the most advanced, secure, and cost-effective storage solutions for the evolving data lifecycle.
