

MULTISTOR BD 340 CLOUD TAPE LIBRARY

A cloud tape library replicates traditional tape-based storage systems within a cloud environment

Gain More Control over Your Corporate Data

Businesses today depend heavily on data for informed, real-time decision-making. While cloud storage simplifies data storage, retrieving information can be complex and costly.

Tape-as-a-Service (TaaS) offers a cost-effective solution for managing and storing vast amounts of unstructured data. It reduces time and expenses, allowing companies to backup critical information, store infrequently used data, and manage large datasets for AI and machine learning applications efficiently. TaaS helps enterprises control their data more effectively, providing an easy way to store, protect, analyze, and archive it.

Types of Unstructured Data

Unstructured data makes up 80% to 90% of corporate information -

- Video
- Sensor data
- Audio files
- Photos
- Security camera footage
- Scientific data
- Satellite imagery
- AI/ML Training Data

Simplicity is a LT ZERO Strength

Our solution is intuitive and simple to deploy:

- Upload company data
- It is written to industry standard tape
- Store it within our data center
- Send it back to you and read it on any compatible tape drive

Use Cases

Data Management Problems

Video and other forms of unstructured data need to be protected. Why? Mishaps occur, and systems are broken into. As a result, companies must retrieve and restore corporate information ASAP.

Ransomware Attacks

A malicious outsider shuts down access to the company systems. Corporations must pay large sums of money before access is restored.

System Outages

Computer systems are machines and do not operate flawlessly. Disruptions knock business applications offline. Companies need a quick and easy way to get back up and running.

Repurpose Content

A firm runs a successful marketing campaign. Much of the content is used once, stored, and often forgotten. A better business case repurposes all or parts of the materials a few or many months later. Again, they need a simple way to recall that information.

MULTISTOR BD 340 CLOUD TAPE LIBRARY

How Does TaaS Improve Your Business?

Cost

- Lowest priced storage option: \$0.001 per GB per month
- Only pay for what you use
- No hidden egress fees

Environmentally Friendly

- Minimal power consumed
- Offline storage reduces ongoing charges
- Aligns with important corporate Good Citizen goals

You Gain Control

- You completely control your data
- You only own the tape and its information
- Store it locally or keep it at our site

Flexibility and Interoperability

- Open standard format
- Avoid vendor lock in
- Integrate into existing data backup

High Levels of Security

- Data is air-gapped and safe from Ransomware
- Data on dedicated media and not in a shared pool with other users
- Not open to outside intrusion
